For lab assignment 5, part 2, you should work through the material in chapter 6 of the Excel manual. The data for this lab is on the class website http://cs.usfca.edu/peter/stats/class_lab5.2. Most of the material is self-explanatory. However, there are a few errors. So you should be sure to look over the “Corrections to the Manual” below.

What to Turn In
You should turn in the following material.

1. A two-way table showing counts and totals as in Figure 6.6.
2. A two-way table showing percents of column totals as in Figure 6.8.
3. A bar graph showing relative effectiveness of the treatments as in Figure 6.9

Corrections to the Manual

1. In step 6 on page 67, the buttons are labelled “Result” and “Treatment,” not “Relapse” and “Placebo.” You should drag Result to Row, Treatment to Column, and Result to Data.

2. In the paragraph after Figure 6.6 on page 68, the first line should read, “You may wish to express the data as percentages of column totals, . . . ”

3. In item 1 on page 69, in order to select the table, select from the bottom left-hand side of the table to the top right-hand side.
