

To get a command line window:

Click on 'Start'.

Click on the option 'Run'.

Type *cmd* in the box that appears and click 'OK'.

Lets try out SMTP and email...

EXERCISE 1: Connect to the server named 'nexus', to implement and try the SMTP.

Please type the following :

telnet nexus 25

EXERCISE 2:

You will now send a mail to any of your friends in this room!

You can also send a mail to yourself.

Type the following:

HELO <your name>

MAIL FROM: <any email address: eg: priyankadaultani@gmail.com>

RCPT TO: <priyankadaultani@yahoo.co.in>

DATA

<Enter your message>

.

QUIT

EXERCISE 3: Repeat exercise 2 changing the address on the MAIL FROM line with another address.

EXERCISE 4: Repeat exercise 2 misspelling some of the commands and check the errors you get.
